Who We Are

Lot 9 LLC is a Service-Disabled Veteran-Owned Small Business founded in October 2022. The company began serving the veteran community in e-commerce, expanded into local service operations, and moved into information technology through a managed IT and live-streaming engagement we still deliver today. Our federal focus is **business-to-government technology resale**. Lot 9 is **primarily engaged in the retail and wholesale trade** as an established **dealer and reseller of IT hardware and software, communications and radio equipment, and medical equipment**, supplied to federal agencies through authorized OEM and national distribution channels.

Our value is straightforward: we bring the catalogs of major OEMs and national distributors into set-aside channels those large firms cannot bid directly.
